SUMMARY

AI/ML developer with hands-on experience building and deploying AI-powered applications using Python, LLMs, and real-time APIs. Experienced in React-based frontend development and integrating external APIs into production workflows. Familiar with RAG techniques, prompt engineering, and end-to-end application deployment on cloud platforms. Seeking entry-level roles in AI/ML or full-stack development in India.

SKILLS

AI & ML: LLMs, RAG, Prompt Engineering, Deep Learning, Transfer Learning, TensorFlow, Keras, Scikit-learn

Languages: Python, JavaScript, React, React Native, Java, C, HTML/CSS

Data & Tools: Pandas, NumPy, SQL, Matplotlib, EDA, Streamlit, Git, GitHub, REST APIs, Streamlit Cloud

GenAI: Groq (LLaMA 3.3), Gemini, ChatGPT, Claude — applied to data analysis and app development

EXPERIENCE

Apprentice Trainee

MicroObjects Pvt Ltd - Ernakulam , Kerala

August 2025 - Present

- Developed modular React components for data-intensive web applications, improving maintainability and code reusability.
- Integrated REST APIs and optimized state management for efficient server-client data flow.

PROJECTS

AI Stock Research Tool | Python, Streamlit, Groq LLaMA 3.3, yfinance, NewsAPI – [Live Demo](#)

- Built and deployed a real-time AI stock research app with BUY/HOLD/SELL signals, RAG-based LLM analysis, and stock comparison feature.
- Integrated live market data, news sentiment, MA7/MA30 moving averages, and volume charts — analysed 50+ stocks across US and Indian markets

Dog Breed Classification | Deep Learning – [Google Colab](#)

- Built an image classification pipeline using Transfer Learning (MobileNetV2) to classify 120+ dog breeds.
- Applied data augmentation, normalization, and early stopping techniques to improve model generalization.
- Utilized learning-rate scheduling to optimize convergence and prevent overfitting.
- Achieved high validation accuracy across 120+ breeds — Tools: TensorFlow, Keras, NumPy, Pandas, Matplotlib

Heart Disease Prediction | Classification – [GitHub](#)

- Built and compared Logistic Regression, KNN, and Random Forest models for clinical diagnostic prediction.
- Achieved 88% accuracy and 84% cross-validation score using Logistic Regression.
- Performed hyperparameter tuning to improve model performance and achieve optimal accuracy.
- Tools: Scikit-learn, Pandas, Matplotlib, NumPy

CERTIFICATIONS

Artificial Intelligence Essentials V2 - Coursera (2026)

Complete A.I. & Machine Learning Bootcamp — Udemy (2026)

Google Data Analytics Professional Certificate — Coursera (2024)

EDUCATION

Bachelor of Computer Science and Engineering

APJ Abdul Kalam Technological University • Kerala, India • 2020 - 2024 • 7.7/10
